Trial Record

Use this data sheet to record discrete responses on numerous trials. Use during acquisition phase of learning to assess emerging responses. <u>Repeated Trial</u> method presents rapid opportunity for practice. <u>Distributed Trial</u> method presents opportunity throughout the day.

Name: **Start Date:**

Behavior:

Mastery:

Criterion for Mastery: _____ % correct on _____ of _____ days.

Instructions:
1. Record name, date, behavior, and criterion for mastery.
2. Score each trial according to scoring key above.
3. Calculate percent mastery using *correct* responses only. Chart on bar graph below.
